Description & Mode of operation:

Combined function timer with asymmetrical recycler ON or OFF first selectable by connection between pins A1 and Y1. Individual selection of the time ranges from 0.1 s to 100 h. For mounting on DIN-rail.

Function Aa - Asymmetrical Recycler ON-time period first

The relay operates and the ON-time period (T1) begins as soon as the power supply is connected. After the ON-time period the relay releases for the OFF-time period (T2). This sequence continues until the power supply is interrupted for at least 200 ms.

Function Ab - Asymmetrical Recycler OFF-time period first

The OFF-time period (T1) begins as soon as the power supply is connected. After the OFF-time period the relay operates for the ON-time period (T2). This sequence continues until the power supply is interrupted for at least 200 ms.
